

PHANSOL Whitepaper

Version 1.0

The Community Token for Phantom Users

PHANSOL is the spiritual successor to the Phantom ethos — speed, simplicity, and accessibility — but fully owned and driven by the community.

Abstract

PHANSOL (\$PHAN) is a Solana-native token designed to unify and empower the millions of users who rely on Phantom as their primary wallet and gateway to the Solana ecosystem.

At its core, PHANSOL is **community-first**. It was created to solve the fragmentation, short-term hype, and lack of trusted long-term assets that plague much of the Solana landscape. By combining Phantom's proven values of speed and simplicity with transparent tokenomics, strategic deflation, and sustainable incentives, PHANSOL aims to become **the go-to community token for Phantom users**.

With a fixed maximum supply of 1 billion tokens, an 18% ecosystem reserve dedicated to stability and growth, and a commitment to burning 12–15% of total supply over time, PHANSOL is built for longevity rather than speculation. This whitepaper outlines our vision, tokenomics, roadmap, and the mechanisms through which the community will drive the project forward.

1. Introduction & Vision

Phantom revolutionized Solana by making blockchain accessible to millions through its elegant design and seamless user experience. PHANSOL takes the next logical step: transforming that individual tool into a collective movement.

PHANSOL is the spiritual successor to the Phantom ethos - speed, simplicity, and accessibility - but fully owned and driven by the community.

Our single biggest goal is clear: **to become the go-to community token for Phantom users** across the entire Solana ecosystem. We want every trader, builder, creator, and everyday user who interacts with Phantom to see \$PHAN as their shared identity and economic alignment tool.

Community First is not marketing language - it is the foundational principle. Every decision, token allocation, and future development prioritizes the people who use, support, and build within the Phantom ecosystem.

2. The Problem & Opportunity

The Solana ecosystem has grown rapidly, yet it faces several structural challenges:

- **Fragmented Communities:** Thousands of tokens and projects compete for attention, creating isolated pockets rather than unified strength.
- **Short-Term Hype Cycles:** Most launches prioritize immediate pumps over sustainable value, leading to distrust and community burnout.
- **Lack of Trusted Long-Term Tokens:** Few assets demonstrate real staying power or align incentives beyond the initial launch phase.
- **Poor Coordination:** Traders seek momentum and culture, while builders seek reliable support - rarely bridged by a single trusted token.

PHANSOL was created to address these issues directly. By serving as a unifying asset for Phantom users, it offers a stable, community-owned focal point that rewards long-term participation and reduces reliance on fleeting hype. The opportunity is significant: Phantom's massive user base represents one of the most engaged and technically capable communities in crypto. PHANSOL aims to harness that energy into a cohesive, resilient movement.

3. Phantom Inspiration

PHANSOL is not affiliated with, endorsed by, or connected to Phantom Wallet or its parent company. PHANSOL is an independent, community-owned project inspired by Phantom's values.

Phantom set the standard for user experience on Solana. Its clean interface, rapid performance, and reliability made Solana feel simple and powerful. PHANSOL carries this same spirit forward - not as a competitor to the wallet, but as its cultural and economic extension.

We respect and draw direct inspiration from Phantom's values while remaining fully decentralized and community-controlled. This "spiritual successor" model allows PHANSOL to inherit Phantom's energy while evolving through community governance and ownership.

4. Tokenomics

PHANSOL features a strict **maximum supply of 1,000,000,000 (1 Billion) \$PHAN**. No additional tokens will ever be minted.

Current Supply Details (as of launch phase):

- Maximum Supply: 1,000,000,000 \$PHAN
- Taxes: 0% on buys and sells (permanent)

Allocation Breakdown

Category	Amount	Percentage	Purpose
----------	--------	------------	---------

Community / Open Market	720,000,000	72.0%	Fairly distributed via bonding curve to the broader community
Developer / Ecosystem Reserve	180,000,000	18.0%	Long-term stability, controlled distributions, liquidity support, and funding burns
Community Rewards	40,000,000	4.0%	Airdrops, incentives, contests, and participation rewards
Marketing & Partnerships	30,000,000	3.0%	Strategic growth, listings, and ecosystem collaborations
Targeted Reduction	120M – 150M	12–15%	Milestone and community-voted burns sourced primarily from the Ecosystem Reserve

Deflationary Strategy

PHANSOL is committed to a long-term deflationary path. Up to 12–15% of total supply (120M–150M \$PHAN) will be permanently burned through transparent, milestone-based mechanisms. Burns will be triggered by the following criteria:

- **Milestone Burns:** Executed at key growth milestones (e.g., holder counts, listing achievements, community size targets)
- **Community-Voted Burns:** \$PHAN holders will vote on additional burn events via governance once the DAO launches in Phase 3
- **Scheduled Burns:** A portion burned at the start of each roadmap phase as a commitment signal

All burns will be announced in advance, executed on-chain, and publicly verified. No burns will occur without prior community notice.

The 18% Ecosystem Reserve exists specifically to maintain price stability, prevent aggressive pump-and-dump behavior, and enable responsible, controlled growth. Management of this reserve will progressively transition to community governance as the project matures.

5. Utility & Value Accrual

PHANSOL begins as a strong community token and is designed to evolve into a platform that delivers sustainable value.

Planned utility mechanisms include:

- **Community Governance:** A DAO framework enabling \$PHAN holders to vote on treasury usage, burn schedules, and major initiatives.
- **Staking & Rewards:** Opportunities to stake \$PHAN and earn yields from the Ecosystem Reserve and future partnership revenue.
- **Revenue Sharing:** Portions of revenue from partnerships and ecosystem activities will be distributed back to the community.
- **Exclusive Benefits:** Priority access to events, AMAs, content, and opportunities within the Phantom and Solana ecosystems.
- **Phantom Synergies:** Long-term exploration of deeper integrations that enhance the experience for Phantom users.

These features will be rolled out gradually and transparently, always guided by community input.

6. Roadmap

Phase 1: Foundation (*Underway — Q2 2026*)

- Build strong community culture and presence
- Full transparency initiatives and regular updates
- Initial burns and responsible activation of the Ecosystem Reserve
- Organize and grow the core Phantom user base

Phase 2: Growth & Visibility (*Q3 2026*)

- Key listings and liquidity enhancements
- Activation of Community Rewards program
- Strategic marketing and Phantom/Solana partnerships
- Additional community-voted burns

Phase 3: Utility & Governance (*Q4 2026*)

- Launch of community governance (DAO)
- Introduction of staking and reward mechanisms
- Revenue sharing implementation
- Increased community control over project decisions

Phase 4: Ecosystem Expansion (*2027 and beyond*)

- Broader partnerships across Solana
- Position PHANSOL as the central hub for Phantom users
- Support community-led initiatives and sustainable growth

- Continued progress toward the 12–15% total burn target
-

7. Governance & Transparency

PHANSOL is committed to progressive decentralization. While the project is in its initial stewardship phase, the long-term vision is full community governance.

Key commitments include:

- Transparent management of the Ecosystem Reserve with public reporting
 - Community votes on major treasury decisions and burns
 - Exploration of full ownership renouncement and mint authority revocation as the project matures
 - Regular, honest communication from the founder
-

8. Founder

PHANSOL was founded by **XSP**, a pseudonymous Solana developer and dedicated Phantom user. XSP serves as initial steward of the project, with a commitment to progressive decentralization and full community governance over time. The founder's alignment with long-term success is reflected in the project's transparent tokenomics and community-first principles.

9. Conclusion

PHANSOL represents a new chapter for Phantom users - one where speed meets sustainability, and individual wallets become a collective force.

We are not building another short-term token. We are building a lasting community asset grounded in Phantom's values and owned by its users.

The community comes first - always.

Join the movement.

10. FAQ

Is PHANSOL affiliated with Phantom Wallet?

No. PHANSOL is an independent, community-owned project inspired by Phantom's values. It has no affiliation with or endorsement from Phantom Wallet or any related entity.

Can the Ecosystem Reserve be dumped?

The reserve exists solely for stability, liquidity support, and funding burns. It will progressively move to community governance. All significant movements will be announced and verifiable on-chain.

Is there a rug protection mechanism?

LP will be locked prior to major growth milestones. Lock details and duration will be published on-chain and announced to the community in advance. The Ecosystem Reserve will transition to a community-controlled multisig as trusted signers are established.

Will more tokens ever be minted?

No. The maximum supply of 1,000,000,000 \$PHAN is fixed forever. Mint authority will be revoked as the project matures.

How do burns get decided?

Burns are triggered by milestones, community votes, and phase transitions. All burns are announced in advance and verifiable on-chain.

11. Disclaimer

This whitepaper is for informational purposes only. It does not constitute financial advice, an offering of securities, or a solicitation to invest. Cryptocurrencies are highly volatile and involve substantial risk. PHANSOL tokens have no guaranteed value. All participants should conduct their own due diligence and invest only what they can afford to lose.

Future developments may change based on community input and market conditions. Always verify the latest information through official channels.

PHANSOL has no official partnership, affiliation or endorsement with Phantom Wallet, its developers or any related entity.

Let's build something lasting together.

Community First. Phantom Forever.
